To OWA Members

10/20/2022

We hope that everyone is well and thankful that we missed the hurricane with little to no damage. As you all have noticed a new contractor (PCS) has picked up where DAB left off on US 19 and they are looking for completion sometime near the end of 2023.

OWA is looking towards an exciting year with hopefully the completion of US 19, with the accessibility of more material giving us the ability to get back on track with some planned projects.

Just a couple of reminders:

When you're going to be away from your residence for an extended period of time remember to shut the customer ball valve off. This will keep any unexpected use of water from going through the meter.

Please keep our office updated with your contact information, most times we can make a phone call or email and solve a minor problem before it becomes a costly one.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael G Whetstone". The signature is written in a cursive style with a long horizontal flourish extending to the right.

Michael G Whetstone

President
